PERFORMANCE

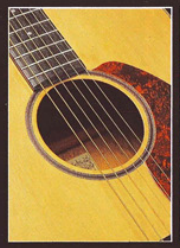
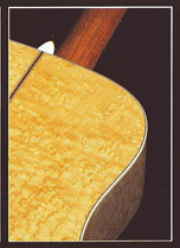
The IBANEZ Performance guitars were designed to offer fine workmanship at affordable prices.
The quality is equal to many guitars that are much more costly. Special attention has been given to assure these instruments have the desired sound, playability, appearance and value.

All IBANEZ Performance guitars feature spruce tops with hand shaped braces. The braces are strategically placed for maximum strength and tonal response, producing crisp highs and balanced lows. Naturally aged materials followed by a kiln drying process, are used to insure consistent quality. Additional features offered are the maple or mahogany back and sides. And sides bound with black/white /black or maple binding, mahogany necks with adjustable truss rods, and white dot inlay position markers on the fret board.





Each Performance guitar is inspected at the factory and again prior to shipment, to insure the qualjty level required to carry the IBANEZ warranty.
