**Astra Series Electrics**

Cimar Astra series electrics have all the most asked for features at a very modest cost. Their appearance and sound is one with instruments costing several times the price.

The Astra series also offers three different types of body and neck construction. Astra 2085 models feature a neck that runs the full length of the instrument and 2083 and 2080 models feature standard bolt-on or detachable necks respectively.

When you add up features and value, it’s hard to beat the Cimar Astra Series.

---

**ADJUSTABLE TORQUE MACHINE HEADS**

The Astra 2085 also features adjustable torque, die cast machine heads. The action of the machine heads can be adjusted from light to heavy to suit any player’s taste.

---

**MAGNA-6 PICKUPS**

Cimar Magna-6 pickups offer the hot output and classic appearance you’re looking for. This cream-colored coil is wound for very high output and the high power ferrite magnets and adjustable polepieces assure you of brightness and balance.

---

**BRASS NUT**

Astra 2083 and 2083 feature a solid brass nut for improved sustain and better balance between open and fretted notes.

---

**FULL-LENGTH NECK AND SMOOTH HEEL**

The neck of the 2085 Model is laminated from rock maple and select walnut. It runs the full length of the guitar for the best possible sustain and extreme rigidity. Because there is no neck-to-body joint, the feel of the neck can be made smooth for easy action in the upper register.

---

**DUAL-MODE PICKUP SWITCHES**

The Magna-6X pickups on the 2083 Model each feature a special two-way mode switch for added versatility. The switch allows the pickup from a standard humbucking to a parallel wired humbucking. This changes the tone from a thick warm humbucking sound to a bright, full sound much like that of a single coil pickup.

---

**EBONY FINGERBOARD WITH ABALONE MARKERS**

The Astra 2085 is one of the few guitars in its price range to offer the superb feel and luxury of a select ebony fingerboard. The dot-style position markers are genuine abalone.

---

**FOUR OCTAVE FINGERBOARD**

All Astra Series guitars feature a 24-fret fingerboard for four full octaves of playability.

---

**ASTRA 2085**

The Astra 2085 has all the deluxe features you could ask for. The maple and walnut neck runs the full length of the instrument and the ash body sections enhance both the appearance and sustain. Magna-6X pickups, gold plated hardware, Dual-Mode switches and a distinctive 4 x 2 peghead are just a few of the many fine points of the 2085.
The Astra 2083 Models perform as good as they look. Their striking appearance is only the beginning of their appeal. The Magna-6 pickups produce warm and clear tones, while the long-scale rock maple neck is an effortless joy to play.

# Astra 2083

- **Body:** Solid mahogany, double cutaway
- **Neck:** Mahogany, 24 frets
- **Fingerboard:** Dot markers
- **Pickups:** Ceramic, single or dual
- **Bridge & Tuners:** Chrome, adjustable
- **Controls:** Individual volume and tone, 3-way pickup selector, dual-mode pickup switches
- **Machine Heads:** Chrome, gloss finish
- **Finish:** Heavy diode plated
- **Available Colors:** Antique cherry (AC), brown sunburst (BS)

## Unique Laminated Body

The body of the Astra 2083 is laminated from beautiful Indian rosewood accented with walnut stripes.

## Magna-6 Pickups

The Astra 2083 models have two of the warmest-sounding humbuckers in existence - the Magna-6's. These classic design pickups are specially made for the Astra series.

## Dual-Mode Pickup Switches

The Dual-Mode pickup switch of the 2083 allows you to select between standard humbucking and parallel humbucking modes for each pickup for a wide variety of sound possibilities.

The Magna-6 pickups on the Astra 2080 have a classic appearance and a sound to match. The warm, familiar sound of the Magna-6 is full and pleasing. The output is also considerably hotter than other pickups of this type.

## Dual Volume and Tone Controls

In order to let you balance your sound the way you want it, the Astra 2080 features individual volume and tone controls for each of the two Magna-6 pickups.

**Astra 2080**

- **Body:** Solid mahogany
- **Neck:** Mahogany, 24 frets
- **Fingerboard:** Dot markers
- **Pickups:** Ceramic, single or dual
- **Bridge & Tuners:** Chrome, adjustable
- **Controls:** Individual volume and tone, 3-way pickup selector, dual-mode pickup switches
- **Machine Heads:** Chrome, gloss finish
- **Finish:** Heavy diode plated
- **Available Colors:** Antique cherry (AC), brown sunburst (BS), brown burst (BS), black finish (BK), white finish (WR)
**XR Models**

The entirely new line of Cimar XR Model electrics offers many improvements over other guitars of similar construction. From the high output pickups to the solid brass bridge saddles, the XR Models have all the updated features you could want.

**High Output Single Coil Pickups**

The pickups featured on the XR Models are wound for increased output over similar single coils. This added output results in a sound that is big and full. Because of their single coil design, XR pickups have extended high frequency response for bright, ringing chords and crystal clear solos.

**Five Position Pickup Selector**

The five position pickup selector on the XR Models allows you to select any pickup individually or any combination.

**DIE CAST BRIDGE WITH SOLID BRASS SADDLES**

The XR bridge is heavy die-cast metal and the bridge saddles are solid brass. This combination provides the utmost in sustain and quick response.

**XR Basses**

Cimar XR basses offer clarity, punch and superb feel at a modest price. Available as either single or double pickup models, and in a variety of finishes, XR basses are one of the best values on the market.

**Die Cast Bridge with Solid Brass Saddles**

The XR bass bridge is precision die cast from zinc alloy and features solid brass barrel-type saddles for excellent sustain. Each saddle is individually adjustable for height and intonation length.

**XR Bass Pickups**

XR bass pickups are single coil designs with a wide frequency response for a pure and clean sound. You'll be well pleased with punch, clarity and excellent output of the XR bass.
## SC Models

Cimar SC models feature a graceful single cutaway body and the warm sound of Magna-6 humbucking pickups. The bodies are constructed of carved jadus or carved maple on mahogany for excellent response and sustaining power. The 2060 and 2061 Models feature a built-in mahogany neck and deluxe die-cast tuning machines.
