### LONESTAR SERIES

The Lonestar Acoustic guitar series was designed to provide the acoustic guitar player the fast feeling neck of an electric guitar with the full body sound only made by an acoustic guitar.

Fully bound dreadnought bodies are built with ultra-electric style necks, 41mm wide at the nut, and feature the easy operation of 8-in-a-line tuning machines.

### AE SERIES

After several years of research Ibanez developed an Acoustic Electric guitar. We took a lot of time for study on the first prototypes to perfect design and improve response, and are now pleased to announce the Ibanez AE series. The years spent on the AE development has resulted in a natural acoustic sounding guitar at a price lower than many guitars without electronics. We also found the perfect design for a thin-body model that offers the same rich tones of a regular full-bodied acoustic with a slimmer more comfortable playing body depth.

### Newly Developed Pickup

Ibanez Acoustic Electric guitars were designed to reproduce the natural acoustic sound, using a newly developed piezo-ceramic pickup.

The Ibanez piezo-ceramic pickup supplies sufficient amounts of gain and tone so you have no batteries to replace. Special shielded wiring has been utilized to prevent the noise commonly found with this type pickup.

The pickup has been placed under the bridge saddle to receive the maximum effect of the string vibrations and soundboard's tonal vibrations. This pickup position also provides a balanced output from all the strings. The tone control on your guitar features a new concept of Hi-Cut, Low-Cut blend to provide a much wider range of tone variations.

#### Controls

- 1. Pickup control
- 2. Turn clockwise to increase output signal.
- 3. Turn counter clockwise to decrease output signal.
- 4. Tone Control
- 5. Flat at center position.
- 6. Turn clockwise to increase treble response.
- 7. Turn counter clockwise to increase bass response.

## VINTAGE SERIES

If you could afford your own custom built acoustic guitar what would you ask for? The finest of seasoned woods, specially designed bracing for the richest of tones, and of course all handmade to your exact specifications by an experienced luthier. However, if like most guitarist owning that guitar is only a dream, then awaken to Ibanez. The philosophy that "The best doesn't have to cost the most" is a standard that Ibanez lives, in the crafting of Acoustic guitars.

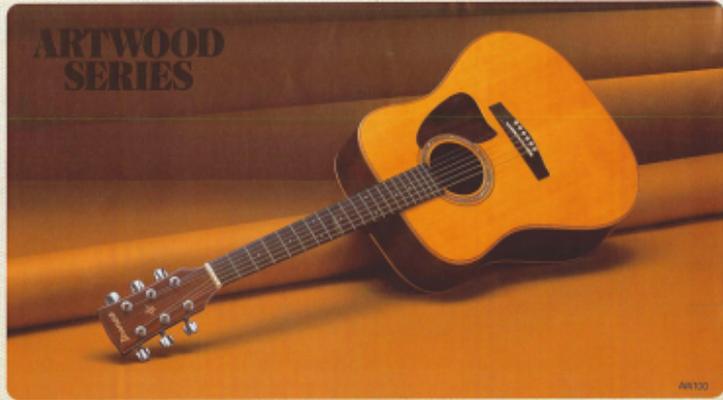

And built by small teams of qualified luthiers there's nothing mechanical about it except the dedication to one and the finest acoustic guitars a little money can buy. All of the critical operations, from the innovative scalloped bracing to the initial logo is checked by conscientious inspectors every step of the way. When an Ibanez guitar is finally set up and tuned we're sure that it represents the best sounding value that you can buy.

AW100

## ARTWOOD SERIES

We have made several Artwood models, each with its own unique qualities, and we are quite proud to introduce the addition of the AW100 to the line. Featuring a solid Spruce top and Ovalgrain back and sides fully bound with Maple and Rosewood the AW100 offers a sound equal only by its beauty. No detail was overlooked on the AW100. Protected by a soft-seal-gloss finish we even sized the strings! We are confident you'll agree that the AW100 proudly bears the distinction of being the Top-of-the-Line.
