IT'S TIME FOR A FRESH SOUND & COLOR. **Ibanez**

PICKUP COMBINATIONS

The Comet II Series is available with 4 different pickup combinations. Single humbucking for flat-out power and simple operation. Two humbuckings for versatility. Three single coils to give the traditional bright, full sound, and Two single-coils and one humbucking for maximum tonal variation and drive.

The humbucking models feature the Super 70 pickup with a Duo-Sound switch which allows the guitarist to choose between a fat, driving humbucking sound and the bright sound of a single coil at the push of a knob.

The Comet II Series also features the Super 5 single coil pickup which is custom wound to produce a bright, punchy tone while maintaining fullness and warmth. On three pickup models, the polarity of the middle pickup is reversed so that hum is canceled when it is used in conjunction with the neck or bridge pickup.

1. ONE HUMBUCKING 2. TWO HUMBUCKINGS
3. THREE SINGLE COILS
4. TWO SINGLE COILS AND ONE HUMBUCKING

FINISH

Finishes available on the Comet II Series include striking pastel and enamel colors. In addition, the pickguard is finished from behind in the same color as the body for a very modern, attractive look.

The combination of a wide variety of sounds with eye-catching finishes makes the Comet II Series guitars one of the hottest performers on the market today.
