

## ■ L.A. METAL LM7 ■

Heavy metal stands for power, high speed and punchy rhythm, and of course heavily distorted guitars. Everything depends on the right sound, a sound that seemed to be out of reach of any effect device available. Those days were over. For now there is an effector that has it all: the hardest and hottest distortion for clearly defined rhythm parts as well as warm solos. There is no heavy metal job the IBANEZ LM7 L.A. METAL can't handle. Here's an effector that will blow your head off.
