

ROCK & PLAY
STEREO CASSETTE PLAYER
RP200/RP202/RP204

The Ibanez ROCK & PLAY Series of stereo cassette players are equipped with a variety of convenient functions designed to let you practice your chops while listening to the songs on a tape, whatever your instrument might be.

The three different ROCK & PLAY units—for guitar, bass, and vocals—include functions designed specifically for the needs of the instrument you're using. One of these features is the Pitch Control, which can be adjusted according to the sound you want from the song you're hearing on the tape. Also, the entire series of ROCK & PLAY is provided with two inputs and two headphone-outputs, so two people can use the same unit to practice together.

RP200

- BASS ENHANCE
- PITCH CONTROL
- COMPRESSOR / CHORUS
- 2 INS / 2 HEADPHONE OUTS

The RP202 for bassists comes with a Bass Enhance feature that speeds up the tape to make it easier for you to pick up the bass line, which can get buried in the sound production of a song. It also allows you to easily enjoy the low-balling of a 5 string bass. In addition, the Compressor essential to a tight bass sound and a Stereo Chorus effect which "widens" the sound are both standard features of the RP202.
