

POWERED FROM BASS

The AFR Concept

With a host of new features, the AFR bass sets a new standard in string instruments. Designed by the innovative Swiss luthier Rolf Spuler, the AFR was created to meet the critical demands of musicians who require a natural sounding sensitive instrument with wide dynamic range and effortless playability during even the longest performances. Additionally, the instrument should look as distinctive as it sounds.

The AFR bass exemplifies all of these qualities; it combines a light weight, aesthetically contoured body with a strong yet comfortable neck, a small headstock and a superb pickup system.

The AFR is the personification of Rolf's unassioned convictions that a new instrument should be both inspired by music and the inspiration for it.

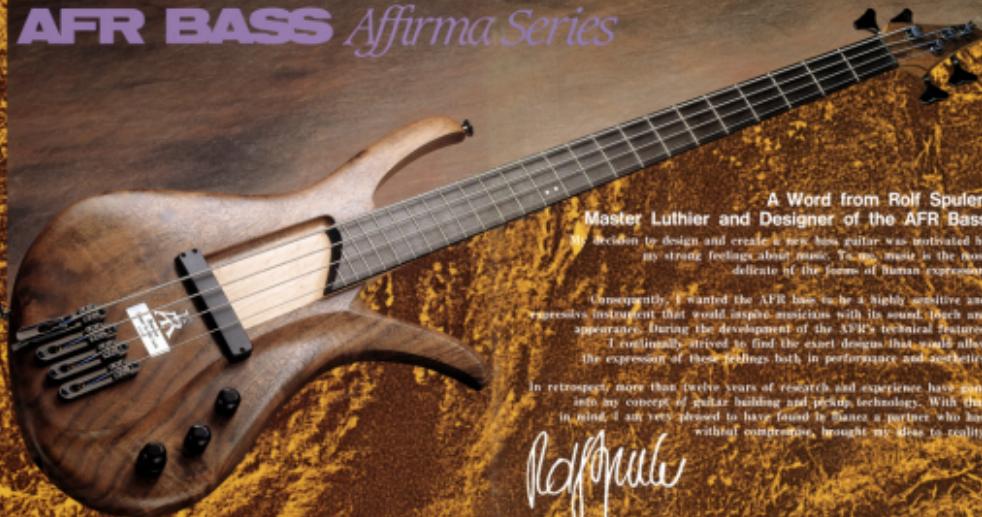

AFR BASS *Affirma Series*

A Word from Rolf Spuler, Master Luthier and Designer of the AFR Bass

My decision to design and create a new bass guitar was motivated by my strong feelings about music. To me, music is the most delicate of the forms of human expression.

Consequently, I wanted the AFR bass to be a highly sensitive and expressive instrument that would inspire musicians with its sound, inert and appearance. During the development of the AFR's technical features, I continually strived to find the exact designs that would allow the expression of these feelings both in performance and aesthetics.

In retrospect, more than twelve years of research and experience have gone into my concept of guitar building and pickup technology. With that in mind, I am very pleased to have found in *Guitarra* a partner who has without compromise, brought my idea to reality.

4 STRINGS

04

A101
BODY: SAMAK
NECK: MAPLE
FINGERBOARD: AMOUNT
HARDWARE: COSMO BLACK
PICKUP: FINGER AND A PW 4 SPECIAL
CONTROLS: V, T, 1 BALANCE, 2 EQ
COLOR: OIL FINISH
*AVAILABLE FRETLESS MODEL ASSAF

A391
BODY: FLAMED MAPLE
NECK: MAPLE
FINGERBOARD: EBONY
FRETBOARDS: COSMO BLACK
PICKUP: PB20 AND AFR 4 SPECIAL
CONTROL: 1-V, 1-BALANCE, 2-B2
COLOR: OIL FINISH
*AVAILABLE FRETLESS MODEL A394F

A394
BODY: KIRALO WALNUT
NECK: MAPLE
FINGERBOARD: EBONY
FRETBOARDS: COSMO BLACK
PICKUP: PB20 AND AFR 4 SPECIAL
CONTROL: 1-V, 1-BALANCE, 2-B2
COLOR: OIL FINISH
*AVAILABLE FRETLESS MODEL A394F

3 STRINGS

05

A105
BODY: SAMAN
NECK: MAPLE
FINGERBOARD: EBONY
HARDWARE: COMO BLACK
PICKUP: PEGO AND AEW 3 SPECIAL
CONTROL: V.U. 1/BALANCE 2/B
COLOR: OIL FINISH

*AVAILABLE FRETLESS MODEL A105F

A385
BODY: KIZALO WALNUT
NECK: MAPLE
FINGERBOARD: EBONY
HARDWARE: COSMO BLACK
PICKUP: P90Z AND AFR 5 SPECIAL
CONTROLS: 3-V, 1-BALANCE, 2-BQ
COLOR: OIL FINISH
*AVAILABLE FRETLESS MODEL, A385F

A385
BODY: FLAMED MAPLE
NECK: MAPLE
FINGERBOARD: EBONY
HARDWARE: COSMO BLACK
PICKUP: P90Z AND AFR 5 SPECIAL
CONTROLS: 3-V, 1-BALANCE, 2-BQ
COLOR: OIL FINISH
*AVAILABLE FRETLESS MODEL, A385F

FEATURES

Only the Most Select Woods...

In order to insure that every AFR exhibits the right sound, feel and appearance, each piece of wood used in its construction is meticulously selected by experienced craftsmen.

The AFR Half-Through Neck

An essential ingredient of the AFR's superior sound is due to Bell's extensive study of sound and guitar design. His work in guitar building revealed that the sound character of a bass or guitar should be influenced only by body resonance and pickup response; the neck should be stiff as possible in order to suppress resonance.

Since the neck and body of a bass perform very different acoustic functions, it follows that different materials should be utilized. To join these materials properly, the AFR's new half-through-body construction affords the best stability because the body is not completely divided (as in standard neck-through-body construction). Also, with half-through-body construction, the AFR's entire body is able to bring all its resonance to bear which provides the optimum in sound character and sensitivity.

The Best of Both Worlds... A Maple Neck Reinforced With Graphite

A maple neck with an ebony fingerboard is a classic and proven combination but it tends to overemphasize its resonance that 'dead spots' happen. The addition of two graphite bars strengthens and stabilizes the AFR neck in order to achieve a much more balanced response. With this

combination of materials, AFR owners receive all the advantages of both wood and graphite necks.

A11BF

BODY: SAMOAN
NECK: MAPLE
FINGERBOARD: EBONY
HARDWARE: COMO BLACK
PICKUP: PIZZO AND AFR-5 SPECIAL
CONTROL: 1-V, 1-BALANCE, 2-BQ
COLOR: OX FINISH

A11GF

BODY: SAMOAN
NECK: MAPLE
FINGERBOARD: EBONY
HARDWARE: COMO BLACK
PICKUP: PIZZO AND AFR-5 SPECIAL
CONTROL: 1-V, 1-BALANCE, 2-BQ
COLOR: OX FINISH

F E E A T

An Entirely New Bridge
Rolf Spaler created the "Mono Rail" bridge (pat. applied for) exclusively for the AFR bass. This very sophisticated system features an individual unit on each string so that each string's vibration is transmitted separately to the body. This provides

a much more dynamic response and sustain than found in conventional bridge systems. Changing strings also becomes much simpler and faster. The four-string of the AFR version is fitted with the "Stay-D-Tune" detuner (pat. applied for) on the low string. This innovative feature allows for quick change between two different tunings (for example, E to D).

Thumb Rest

More and more bassists are using different hand positions to achieve wider varieties of sound. The AFR's thumb rest makes it possible and comfortable to pluck the strings from any thumb position.

Headstock Arrangement

Note the AFR's reversed tuning machine configuration which reduces headstock mass and also provides straighter and shorter string lead to the saddle. This arrangement gives the AFR easier, more accurate tuning with increased tuning stability.

U R E S

The AFR's Active Electronics

The AFR's active electronics offer very efficient bass and treble controls, a soft volume control, and a balance control that mixes the magnetic and piezo pickups. The

AFR's 18V powered electronic circuitry does not limit the dynamics of the pickups which makes the AFR an instrument of incredible expressiveness.

A Piezo Bridge Pickup

All AFR models come with the "ppp" (pat. applied for), a polyphonic pickup developed by Rolf Spaler. Its ingenious construction shows a completely separated pickup for each string which allows the pure transformation

of each string's vibration to an electric signal. This piezo pickup consistently reproduces an entirely natural sound with strong presence, powerful low end and a very high dynamic response. There are no disturbing "scratches" sounds, slide-noises or feedback. The level of each piezo pickup can be individually adjusted by a trim potentiometer located on the PC board.

A Magnetic Neck Position Pickup

The AFR's magnetic neck position pickup is a more conventional magnetic pickup capable of covering a wide frequency range. Located in the standard position between neck and bridge, this pickup reproduces both solid lows and crisp trebles.
