

New Machinery For '92

Soundtank effects smash through the price barrier with professional specs at unbelievably low prices. The original Soundtank distortion pedals, with their sounds from mellow to the unmerciful, have been the weapon of choice by musicians the world over—no matter what their budget.

New Machinery For '92

For 1992, six new Soundtank pedals join the battle for a better sound at a better price: the CS5 Super Chorus, the FL5 flanger, the CP5 compressor, the DL5 digital delay and the PH5 phase shifter. And now, with the new TS5, the Soundtank series is now armed with the Tubescreamer, the most popular overdrive/distortion unit in the world.

Soundtank: Because in the fight to be heard, every musician deserves the best.
