

1996 IBANEZ BLAZER GUITARS LIMITED EDITION

Since the **BLAZER** was reissued last year, the quality Japanese-made standard guitars have been well accepted in the market. This year we are pleased to introduce two limited edition models.

The new **BLAZER** guitars feature new body materials such as **AGATIS** and **ZEBRA-FINISHED ASH**. Someone remember that the **ZEBRA-FINISHED ASH** was also available on the original **BLAZER** models in the 80's. The basic specifications are consistent on the concept of the **BLAZER** that is the quality standard. But also these different tastes give you a variety of choice on the **BLAZER** line this year.
