AW SERIES

Since the 1980's, Alvarez® Acoustics have set the standard for affordable professional acoustic guitars.

Our all-new 2000+ Alvarez lineup raises the bar. In addition to Alvarez's hallmark solid guitars, all Alvarez acoustic new feature die-cast tuners. The acoustic-electric models now come equipped exclusively with both Fishman pickups and EQ's.

The new Alvarez line also offers an even wider selection. Along with the traditional dreadnoughts, there's a grand concert model, right and left handed acoustic-electric cutaways, and even a parlor-bodied 7-string.

ALL AW GUITARS feature:

- Die-Cast Tuning Machines
- Solid Spruce Top
- Sealed Binding (except AC100T & AW100T)
- Advanced Fishman® Preamp & Bridge
- Mahogany Neck
- Solid Glass Fretboard

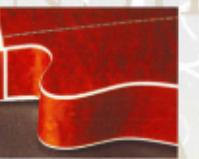

PREFIX™ Acoustic Matrix® Pickup

• **PREFIX™ "PREFIX PLUS" EQ**
Fisher's exclusive Acoustic Matrix pickup provides the most natural sound and response of any pickup. The PREFIX PLUS EQ specifically complements the Acoustic Matrix pickup with active shelving boost controls that provide a smooth transition from top to bottom for smooth and musical tone shaping. The PREFIX PLUS also features an active brilliance control with a precise volume control and an adjustable switch for lighting up feedback.

SENSORS™ Sensors® Pickup

• **PSENSORS™ "Sensors® Classic 4" EQ**
The Sensors pickup utilizes a capouner material infused with a special braided wire cable. Like the Acoustic Matrix, the Sensors pickup is a dual coil pickup that provides more low end response and less mudding. The Classic 4™ 4-band EQ offers a flat response or a choice of three controls with resonance style low-cut and balance controls.

Figured Maple Back & Sides:
The AW200NT and AW300CENT feature exquisitely figured maple back and sides of either quilted pecan or flame maple.

AW200CENT

- Dreadnought Body
- Gold Grover Tuning Machines
- Solid Spruce Top
- Figured Maple Back & Sides
- Fishman Acoustic Matrix Pickup
- Fishman PREFIX PLUS EQ

AC100T

- Grand Concert Body
- Chrome Die-Cast Tuning Machines
- Solid Spruce Top
- Mahogany Back & Sides

Growth Tuners

- Stringing, the technique of connecting the individual strings of a guitar, allows maximum vibration while providing maximum strength. AW100NT and AC100T guitars feature stringing.
- 7-String
 - Cutaway Jumbo Body
 - Solid Spruce Top
 - Gold Grover Tuning Machines
 - Rosewood Back & Sides
 - Fishman Acoustic Matrix Pickup
 - Fishman PREFIX PLUS EQ

Solid Tops of Sitka or Engelmann Spruce...
Not only do solid tops resonate louder and louder over time, but they are also more durable with age. Rivers Luthiers personally select the Sitka or Engelmann spruce used in crafting Alvarez acoustic guitars.

Crosses in the Pacific Northwest, Sitka spruce is one

of the most popular tone woods for guitar tops due to its natural strength and natural durability.

When comparing guitars in the same price range, you'll find that Sitka uses a much higher grade of wood than Engelmann spruce.

Englemann spruce is known by makers of fine guitars for their tonal qualities because of its overall greater density and natural strength.

John Englemann spruce is a straight-grained, tight-

grained wood with a fine, uniform texture.

ARE YOU READY JAM PACK & JAM PACK JR.

Ready to jam? With Ibanez there's more than one way to do it. Ibanez Jam Packs and Jam Pack Juniors give you your choice of dreadnought, dreadnought with Spanish instruction video, black finish dreadnought and nylon classical.
