MULTI-HOLDERS

The Tama Multi-Clamp Hardware System grew from the need to more adequately mount accessories and microphones. You can now not only custom design your Tama set, but your Tama hardware as well.

The Multi-Clamp System is based on the versatile multi-clamp with many, many optional parts for just about any application. Extra tom arms can be added, extra cymbals placed anywhere around the kit, and complete set of mikes can be mounted to your existing hardware without purchasing new stands. The result is an efficient, good looking and professional set-up wherever you play.

MULTI-II HOLDER

Most Multi-Clamps are used to mount cymbals and microphones. In order to give you the most flexibility in one product, we've designed the new Multi-II holder that incorporates both a cymbal holder and mike holder. This new model is bound to become "everybody's Multi-Clamp".

TAMA SWINGSTAR

SHELLS

Tama Swingstar - the heavyweight standard for wood drums.

Constructed of 8-ply of select mahogany.

Tama drums offer a great consistency of tone and drum-to-drum balance.

The inside surface of Tama drums is finished with Zola-Coat, a tough, durable finish that provides an excellent moisture barrier for consistency of sound year in and out.

METAL SHELL

Tama Swingstar Snare Drums feature a seamless metal for the best metal snare drum performance.

The seamless shell snare drums have a warm and fat sound that won't break up or choke even in the loudest, loudest riffs.

TOM TOM HOLDER

The Tama Omni-Sphere double tom holder offers you virtually unlimited freedom set-up. It's perfectly interchangeable with previous Tama tom holders and fits all standard Tama bass drum and tom brackets.

The unique securing system eliminated the need for four arms when setting up your toms.

Adjusted lightly, the Omni-Sphere lets you move the toms easily, but still holds them in place.

When you find the right position, just lock things up. Most other universal-type tom holders have parts that protrude into the shell.

This is not only unsightly, but disturbs the natural resonance of the shell.

All Tama mounting hardware is on outside of the toms, allowing maximum tone.
