

ELECTRONIC PERCUSSION COMPLETE TECHSTAR

## THE TECHNO STATION

## TECHSTAR AND POWER TOWER SYSTEM

Music, an ever-moving, ever-flowing progression has reached a turning point.  
Electronic technology has created new directions to follow into the future.

The time to turn is now.

The place to begin is here.  
THE TECHNO STATION  
TAMA TECHSTAR and  
POWER TOWER SYSTEM

**TAMA**

## Electronic percussion Comes of Age.

Tama proudly introduces the second-generation electronic drum kit from TECHSTAR: the TAK500. Advanced analog design makes the sounds of the TAK500 hotter than ever. The new TECHSTAR pad design makes the set-up more concise while retaining the famous TECHSTAR "real-drum" feel. The new POWER TOWER hardware systems (available separately) combine rock-steady support with surprising flexibility and lightweight portability. The TAK500 Electronic Drum Kit ushers in a new age of electronic percussion: the age of cost-effective professional performance.

### TECHSTAR DRUM SET TAK 500

The TAK500 is a five-piece kit consisting of snare, bass and three tom-toms. Each kit includes four TSP100 Drum Pads, one TSP150 Bass Drum Pad with spurs, the TAM500 Voice Module and cables for connecting the pads to the voice module.

### VOICE MODULE TAM 500

At the heart of the TAK500 is the TAM500 Voice Module. This totally redesigned TAM500 makes it easy to tune in each drum sound quickly and repeatably. The range of sound possibilities is virtually infinite, from acoustic to electric to totally custom. Each voice features a pad-trigger input, separate voice output, separate sensitivity and output levels, and trigger LED. The TAM500 also provides a mono-mix output and a headphone output with separate level control.

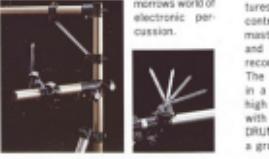

#### OPERATIONS DESCRIPTIONS

- TRIGGER
- HEADPHONE JACK

- TONE/NOISE
- LEVEL
- VOICE OUTPUTS
- POWER LED

## POWER TOWER DRUM STAND SYSTEMS

TAMA's new "high-tech" looking PTD100 and PTD50 systems set up in minutes and accommodate up to 4 TSP100 pads. By adding the TMB1100 (optional) to the PTD100, you may position the TAM500 (or any other voice module) conveniently at your side. Power Tower Systems have proven their strength in the past in use as keyboard stands and are now rapidly becoming the basic framework for tomorrow's electronic percussion.

### TECHSTAR PADS

**TSP 100, 150** The TSP100 Drum Pad takes the TECHSTAR "real-drum feel" to a new smaller size and shape. The TSP100 uses a real 10" drum head and a new internal design for increased isolation from the frame, a wider range of "tunable" surface response, and improved reliability. The new size and shape let you set up as close and tight as you will. The TSP150 Bass Drum Pad also incorporates a new shape and internal design for improved pedal feel and articulation.

## DRUM AMPLIFIER

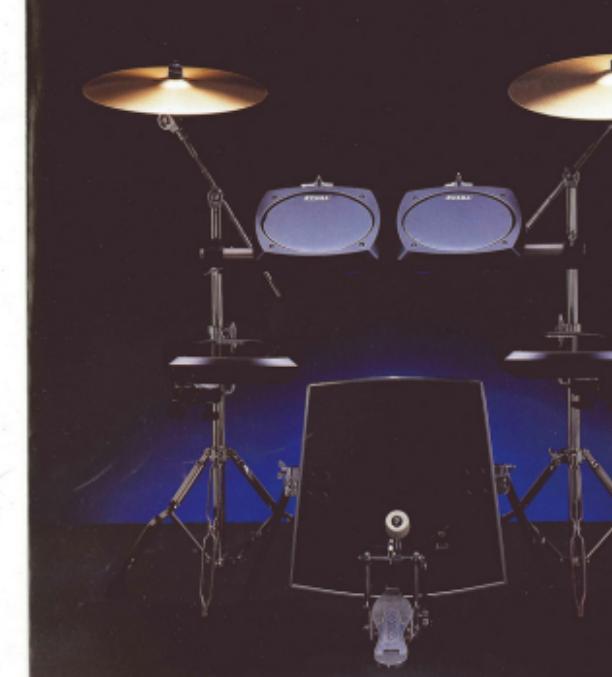

**TDA 60** An amplifier/monitor system specifically designed for electronic drums! The TDA60 DRUM AMPLIFIER combines a high-headroom 60-watt amplifier with a heavy-duty 2-way speaker system for a punchy, wide frequency range, with dynamic range reproduction system. The TDA60 may be used as a personal drum monitor and as a live or practice amp that cuts through in any situation. The TDA60 features two inputs with individual volume controls, two-band active equalization, master level control, peak power display and line-level output for use with PA's, recording studios and other reproducers. The speaker system features a 12" woofer in a bass-reflex enclosure and separate high output tweeter for smooth response with power and presence. The TDA60 DRUM AMPLIFIER—the perfect answer to a growing need.

## DRUM SEQUENCER

### TSQ 1000

The TSQ1000 is a 6-channel programmable drum sequencer that lets you create and store your own drum patterns, and play on top of the patterns in real time! Control up to six separate voices from your TECHSTAR Voice Modules, with TS16 1/4" control or other voice modules, with up to 32 programmable patterns. The TSQ1000 permits you to use the TECHSTAR pad set to "play" which extends on top of the patterns using the same Voice Information. The TSQ1000 displays all important information for programming and playback. Conveniently rack mountable, the TSQ1000 easily fits into any electronic system.

### POWER TOWER DRUM STAND

**PTD 100** The PTD100 is a special-design light-weight support system for TECHSTAR kits. The PTD100 supports four TSP100 Drum Pads, two cymbals, and provides space for any standard bass drum. Easy to set up and exceptionally flexible, the PTD100 will provide rock-steady support, regardless of playing style.

### TECHSTAR MODULE BAR

**TMB 1100** The TMB1100 interface with the PTD100 to provide convenient positioning of voice modules or other accessories. It's keyed shaft offers 2 adjustable arms and locks for sturdy support.

# TECHSTAR AND POWER TOWER SYSTEM

## POWER TOWER DRUM STAND

**PTD 50** The PTD50 provides simple, cost-effective support, without sacrificing flexibility. The PTD50 consists of two 6893T Cymbal Stands and four PT01 Pad Holders, and is suitable for use with TECHSTAR kits.

### PAD HOLDER

**PT 01** The PT01 lets you put your TECHSTAR pad almost anywhere! Designed to fit onto any standard cymbal stand, the PT01 is an inexpensive, indispensable way to put your drums where you need them.

#### ACCESSORIES

**TS 14  
TECHSTAR CABLE**

TS14 is a 4-meter cord to hook up your TECHSTAR Pad to Voice Module.

**TS 16  
"Y" CORD**

The TS16 "Y" Cord accepts input from your TECHSTAR Pads and the TSQ1000 Drum Sequencer. These inputs are combined to drive the TMS500 Voice Module simultaneously.

**TSP 40.50  
PAD CADRE**

The TSP40 and TSP50 Pad Cadres are the perfect way to carry your pads safely and easily. The TSP40 carries up to four TSQ1000 Drum Pads. The TSP50 carries one TSP150 Bass pad.

**RH 2  
RACK HOLDER**

The RH2 Rack Holder lets you mount your TAM500 Voice Module into any standard 19" rack. The RH2 Rack Holder mounts easily using the six bolts provided.

**PC 50 (for PTD50)  
PC 100 (for PTD100)**

**POWER TOWER BAG**
