TAMA STAR BUBINGA

STAR is the new flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. STAR Bubinga features a much thinner shell than Starclassic Bubinga. In addition, every shell comes equipped with two 2mm thick Sound Focus Rings (SFR) for structural support. This shell configuration provides clear projection and resonance to highlight the distinct sound of Bubinga.

STARCLASSIC BUBINGA

Starclassic Bubinga shells are made slightly thicker than those in our Starclassic Maple series to provide a more aggressive attack, a fuller deep and dark tone, and more powerful resonance. Numerous options are available to meet the varied and critical needs of professional drummers including a selection of more than 20 different shell sizes. Starclassic Bubinga also features two shell finish choices to choose from: black nickel and chrome. Starclassic Bubinga is simply an unprecedented combination of style and sound.

In the '70s, TAMA’s Superstar® drums and hardware emerged as the perfect drums for the times. But TAMA’s builders and designers weren’t content to rest on their laurels, anticipating the trends of the time; something timeless - drums that understood a player’s passion and allowed the expression of every genre, style, mood, and technique. To achieve this, TAMA created Starclassic Maple.

The distinct and traditional sound of birch has made it the go-to choice for many pro drummers over the last 30 years. TAMA believes it’s time to take birch in an entirely new direction. By using bubinga wood as the inner plies of a birch shell, we have created a blended shell that provides a new sound featuring the focused attack of birch, and the enhanced lows of bubinga.

If you start playing Imperialstar drums as a beginner, you’ll still be able to enjoy them when you’ve achieved pro status.

Then improved before it was accepted as part of the Imperialstar design.

With nearly 40 years of drum building experience, TAMA knows what drummers really want. With this in mind we sought out to design an affordable yet durable kit that retained many high-end features you’ll find in Silverstar, Superstar, and Starclassic. With an all-maple shell construction, you have a drum kit that will last a lifetime and keep delivering the sound that you love.

You’ll also find that Imperialstar's hardware is of the best quality, ensuring you can focus on your playing and not the setup. In a world where drum sets are available in a variety of colors, TAMA offers a wide selection of finishes that are sure to match your style.

And if you’re looking for an even more custom look, you can add MEINL’s HCS Cymbals to your kit. These high-quality brass cymbals are built to last and will add an extra notch to your drumming setup.

So, whether you’re a beginner or a pro, Imperialstar is the perfect drum kit for you. It’s affordable, durable, and full of high-end features that will take your drumming to the next level.
RHYTHM MATE
drum kit is a TAMA’s entry level kit. Precise bearing edges provide easy tuning that beginners need and the wide tuning range that pros demand.

TAMA’s original Accu-Tune Bass Drum Hoops offer lighter weight and faster, more consistent tuning than traditional metal hoops. And if that wasn’t enough, the hardware is equipped with double-braced legs for increased stability. TAMA Rhythm Mate drums are breaking all the rules for entry level kits.

Add-on Cymbals
To order the kits with cymbals, please add “C” to the model number. ex) RM50YH6 --- RM50YH6C

HARDWARE KITS

TAMA DRUMS AND HARDWARE

TO M STANDS & TOM HOLDERS

We offer various hardware kit packages to complement any drum set.

TOM STANDS & TOM HOLDERS

TAMA's tom stands and tom holders feature our original Omni-Ball system which allows each tom to be held securely in place. You can position the drum at virtually any angle simply by loosening one T-nut.
CLAMPS AND ATTACHMENTS

Back in the 1970’s TAMA’s original introduction of the multi-clamp was a real revolution in the complex instrument we know as the drum kit. Today, multi-clamps are standard equipment in drums of all brands.

UNIVERSAL CLAMP

MC66
One side can hold pipes with diameters from 15.9mm to 28.6mm. This simple clamp is a universal type that can be used even for the thinnest diameter at various angles. Excellentclamp for adding an array of new set-up possibilities.

MC67
This universal type of the MC66. Both side holds pipes with diameters from 15.9mm to 28.6mm. MC67 is a compact clamp and the LCB L-rod is held a 12mm to 20mm diameter rod or pipe at various angles.

MULTI-CLAMP

MC61
A basic clamp for connecting stands with pipes from 15.9mm to 28.6mm in diameter with no adjustment having a 15.9mm diameter pipe.

MC62
A universal clamp for connecting two pipes from 15.9mm to 28.6mm in diameter. Both side feature the Ratchet clamp Easy Set-up System.

COMPACT CLAMP

MC5
A clamp for connecting parts with diameters of between 15.9mm to 19.1mm. By combining a basic arm (MC5, MCB50, etc) and 1 1/4” L-ROD (L-120, L-140), this clamp can be used to attach a variety of parts onto a simple bass arm.

MC7
Same function as the MC5, but with even greater flexibility. The ratchet feature function can make any diameter tube from 12mm to 25.4mm.

CLOSED HI-HAT

MXA3
Simply designed closed hi-hat clamp that allows for two different settings by turning a lever. Attachable to stands from 15mm to 28.6mm in diameter. Good for double bass or lacquer pedal players. And, you can also use it open to hold symbols by adjusting the spring.

CLOSED HI-HAT

MXA73
This closed hi-hat attachment is ideal for double bass playing. The tension adjustment knob makes it possible to finely adjust the degree of opening of the hi-hat. In addition, the angle of the bottom section is also adjustable, which allows for subtle adjustment of the angle of the closed or half-open hi-hat by changing how high an escapee with each hit.

L-ROD FOR TOM

L-ROD FOR CONWELL

L-ROD FOR RW200

LCB
A rod for mounting different hand percussion instruments and accessories. Can be clamped to pipes from 15.9mm to 28.6mm in diameter for easy and versatile attachment.

CYMBAL STACKER

CSA15
The CSA15 is a high-powered cymbal stacker. Attach any cymbal to any angle.

CSA25
The CSA25 allows positioning of a small cymbal on the 19mm threaded cymbal nut, as well as independent angle adjustment.

CSA35N
Our cymbal stacker is now compatible with all TAMA cymbal stands, including those with Quick-Set Thumbscrews. Universal application to 19mm to 25.4mm diameter cymbal rods.

RATCHET ARM

MRB30
The MRB30 features a 10mm nut for faster drum setup. 300mm (11 3/4”) length.

MTA30
The MTA30 ratchet arm features a 16mm pipe. 450mm (17 3/4”) length.

RATCHET ARM

MCB30EN
300mm (11 3/4”) length. The MCB30EN can be used in combination with a ratchet arm on the MCB3 universal clamp.

MCB45EN
450mm (17 3/4”) length. The MCB45EN can be used in combination with a ratchet arm on the MCB universal clamp.

Cymbal Holder

CA30EN
300mm (11 3/4”) length. The CA30EN can be used in combination with a ratchet arm.

CCA30
300mm (11 3/4”) length. The CCA30 can be used in combination with a ratchet arm.

TOM ATTACHMENT

MC69
Clamping the attachment at a 15.9mm to 28.6mm diameter pipe allows for easy set-up of tom. Even with a compact construction, the inclusion of the Omni-ball feature at the angle adjustment peak lets you adjust tom to any angle.

CONWELL ATTACHMENT

CBAS
Conformed to the universal clamp with the LCB rod. The CBAS-A is for multiple percussion instruments and accessories. Can be clamped to pipes from 15.9mm to 28.6mm in diameter.

CBB20
Contact the hi-hat to the rod of a bass drum where the rim and the ratchet can be closed. An improved design feature the Pana-clamp mechanism from the Coax pedal makes attachment easier and more secure.

**DX SERIES PEDAL BAG**

The DX Series Stick Bag is designed for each type of use and convenience. The bag comes standard with both a handle grip and a shoulder strap so that you’re ready to go no matter where or how you’re going. When incorporating the bag into your set, built-in hooks on the DX Series Stick Bag fit easily on the floor tom tension rods for easy set-up and removal. In addition, by allowing the inner pocket designed to hold two new pads, grabbing new sticks while playing is easier than ever.

You have wheel pedals go through night after night. After being stomped on over and over, they get thrown in bags and roadcases where there’s more hard rock and roll than the gig itself. That’s why precision instruments like our Iron Cobra and Speed Cobra come with a specially designed protective carrying case. It’s amazing in one thought of finishing.
