A glimpse of the TAMA drum factory in Japan
Our skilled craftsmen carefully select the best wood using all their senses.
The essence of our Japanese craftsmen is expressed through STAR Drums.
Much thought and research is concealed within these shapes that leads to the sound of STAR.
The essence of our Japanese craftsmen is expressed through STAR Drums.
Vibrant colors invigorate and inspire the mind.
The essence of our Japanese craftsmen is expressed through STAR Drums.
STAR Drums speak to both our origin and our future.
**TAMA STAR BUBINGA**

STAR is the new flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. STAR Bubinga features a much thinner shell than Starclassic Bubinga. In addition, every shell comes equipped with 9mm thick Sound Focus Rings (SFR) for structural support. This shell configuration provides clear projection and resonance to highlight the distinct sound of Bubinga.

TAMA STAR WALNUT

STAR is the new flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. Walnut has long been favored by furniture makers for both its beauty and durability. As a drum shell material, Walnut’s naturally EQ’ed tone has been praised by the drum community for both the stage and the studio. The new STAR Walnut shells project booming low end with enough cut to be heard through any mix.

Our Starclassic Bubinga offerings now include an Exotic Finish line which feature extraordinarily beautiful exotic wood finishes, in addition to the regular lacquer finishes. Their shells are made slightly thicker than those in our Starclassic Maple series to provide a more aggressive attack, a fuller deep and dark tone, and more powerful resonance.

Numerous options are available to meet the varied and critical needs of professional drummers including a selection of more than 30 different shell sizes. Starclassic Bubinga also features two shell hardware finishes to choose from: Black nickel or chrome. Starclassic Bubinga is simply an unprecedented combination of sight and sound.

In the ‘80s TAMA’s Superstars and Imperialstars reigned supreme - the perfect drums for the times. But TAMA’s builders and designers wanted something that transcended trends, something timeless - drums that understood a player’s passion and allowed the expression of every genre, style, mood, and technique. They created Starclassic Maple drums...and ignited the thin-shell revolution. And now the new Exotic Finish line offers beautiful, one-of-a-kind exotic wood exteriors for added visual appeal.

The distinct and traditional sound of birch has made it the go-to choice for many pro drummers over the last 30 years. TAMA believes it’s time to take birch in an entirely new direction. By using bubinga wood as the inner plies of a birch shell, TAMA has created a blended shell that provides a new sound featuring the focused attack of birch, and the enhanced lows of bubinga.

For more than forty years, the Superstar name has stood for groundbreaking design, superior build quality, sterling tone, and clear projection. Superstar Classic once again upholds tradition by raising the bar for discerning drummers—and remarkably—does it while also lowering the price. Drawing on Superstar of the past, its classic TAMA T-shape badge and streamlined low-mass single lugs point to the simpler state of art of the 70’s, while the ingenious Star-Mount system and new thinner gauge 100% maple shells eclipse anything in its class.

CLAMPS AND ATTACHMENTS

Back in the 1970s, TAMA's introduction of the multi-clamp created a real revolution in the way drummers approached drum setup. Today, TAMA multi-clamps are the standard by which all others are judged.

**UNIVERSAL CLAMP**

**MC66**
One side can hold pipes with diameters from 15.9mm to 28.6mm, while the other side is a ratchet holder that can hold a rod from 9mm to 12mm in diameter at various angles. An excellent clamp for adding an array of new set-up possibilities.

LIST: $45.00

**MC67**
The heavier duty version of the MC66. One side holds pipes with diameters from 15.9mm to 28.6mm, while the other side is a ratchet holder that can hold a 12mm to 25.4mm diameter rod or pipe at various angles.

LIST: $55.00

**MC61**
A basic clamp for connecting stands with pipes from 15.9mm to 28.6mm in diameter with any attachment having a 19.1mm diameter pipe.

LIST: $30.00

**MULTI-CLAMP**

**MC62**
A double multi-clamp for connecting two pipes from 15.9mm to 28.6mm in diameter. Both sides feature the FastClamp Easy Set-Up System.

LIST: $40.00

**MC5**
A clamp for connecting parts with diameters of between 9mm to 12mm together. By combining a boom arm (MCB30EN, MCB45EN) and an L-rod (LLT, LCB, LCYE), this clamp can be used to attach a variety of parts onto a simple boom arm.

LIST: $31.00

**MC7**
Same function as the MC5, but with even greater flexibility. The ratchet holder section can hold any diameter tube from 12mm to 25.4mm.

LIST: $42.00

Simply designed closed hi-hat attachment that allows for two different settings by turning a lever. Attachable to stands from 15.9mm to 28.6mm in diameter. Great for double bass or double pedal players. And, you can also set up half open hi-hat cymbals by adjusting the spring.

In addition, the angle of the bottom cymbal is also adjustable, which allows for subtle adjustment of the sound of a closed or half-open hi-hat by changing how air escapes with each hit.

LIST: $132.00

Gong Bass Stand

LIST: $580.00

An early TAMA original, the Gong Bass Drum uses a 22” head mounted Tympani style on a 20” shell with no bottom head. This design produces a thunderous, low-end sound with excellent sustain, characteristic of the large Taiko drums of ancient Japan. The Gong Bass uses a 8mm thick Starclassic Bubinga shell, and is fitted with chrome hardware. The silver-finish aluminum Power Tower stand offers easy, yet secure positioning. *Gong Bass Drum is available in Piano Black (PBK) finish only.

They produce a clear, sharp, percussive "crack" that gives drummers a new way to add accent to their playing, no matter what style of music. Steel Mini-Tymps are available in two models and come with an L-rod (LLT) and a multi-clamp (MC66) for fast, easy mounting.

The 6” diameter shells can be tuned melodically and are available in low-and high-pitch sets.</td>
