In the '80s TAMA's Superstars and Imperialstars reigned supreme - the perfect drums for the
times. But TAMA's builders and designers wanted something that transcended trends, something
timeless - drums that understood a player’s passion and allowed the expression of every genre,
style, mood, and technique. They created Starclassic Maple drums...and ignited the thin-shell
revolution. And now the new Exotic Finish line offers beautiful, one-of-a-kind exotic wood
exteriors for that extra luxurious touch.

The distinct and traditional sound of birch has made it the go-to choice for many pro drummers over the last 30 years. TAMA believes it’s time to take birch in an entirely new direction. By using bubinga wood as the inner plies of a birch shell, TAMA has created a blended shell that provides a new sound featuring the focused attack of birch, and the enhanced lows of bubinga.

For more than forty years, the Superstar name has stood for groundbreaking design, superior build quality, sterling tone, and clear projection. Superstar Classic once again upholds tradition by raising the bar for discerning drummers—and remarkably—does it while also lowering the price. Drawing on Superstar of the past, its classic TAMA T-shape badge and streamlined low-mass single lugs point to the simpler state of art of the 70’s, while the ingenious Star-Mount system and new thinner gauge 100% maple shells eclipse anything in its class.

LIST: $2,200.00

**HGS800**
Gong Bass Stand
LIST: $580.00

An early TAMA original, the Gong Bass Drum uses a 22” head mounted Tympani style on a 20” shell with no bottom head. This design produces a thunderous, low-end sound with excellent sustain, characteristic of the large Taiko drums of ancient Japan. The Gong Bass uses a 8mm thick Starclassic Bubinga shell, and is fitted with chrome hardware. The silver-finish aluminum Power Tower stand offers easy, yet secure positioning.

*Gong Bass Drum is available in Piano Black (PBK) finish only.

Steel Mini-Tymps are available in two models and come with an L-rod (LLT) and a multi-clamp (MC66) for fast, easy mounting.

### OCTO'BANS

**7850N2H/2L/4H/4L**

Octobans are one of TAMA’s first original instruments and have been used by a diverse group of progressive players including Billy Cobham, Simon Phillips, Stewart Copeland, Bill Bruford, Mike Portnoy, and Tim Alexander. Instead of relying on changing drum diameters, the pitch of each Octoban differs according the length of the drum’s shell. The 6” diameter shells can be tuned melodically and are available in low-and high-pitch sets.
