TAMA STAR WALNUT

Lacquer Finishes

STAR is the flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. Walnut has long been favored by furniture makers for both its beauty and durability. As a drum shell material, Walnut's naturally EQ'ed tone has been praised by the drum community for both the stage and the studio. The STAR Walnut shells project booming low end with enough cut to be heard through any mix.

STARCLASSIC MAPLE

Exotic Finishes

In the '80s TAMA's Superstars and Imperialstars reigned supreme - the perfect drums for the times. But TAMA's builders and designers wanted something that transcended trends, something timeless - drums that understood a player's passion and allowed the expression of every genre, style, mood, and technique. They created Starclassic Maple drums...and ignited the thin-shell revolution. And now the Exotic Finish line offers beautiful, one-of-a-kind exotic wood exteriors for that extra luxurious touch. Numerous options are available to meet the varied and critical needs of professional drummers including a selection of more than 30 different shell sizes. Starclassic Maple also features three shell hardware finishes to choose from: Black Nickel, Chrome and Smoked Black Nickel. Starclassic Maple is simply an unprecedented combination of sight and sound.

STARCLASSIC WALNUT/BIRCH

Lacquer Finishes

Exploring limitless possibilities, our result in the wake of countless experimentation came in the form of the Hybrid Shell Walnut/Birch: combining the superior quality warmth and mid to low frequency tone of the increasingly popular and truly unique Walnut, with the well-defined and uncompromisingly solid attack of Birch.

Whilst we successfully preserved their unique sonic trademarks, the characteristics of both Walnut and Birch blend to persuade a very focused sound that would define itself with great distinction within a musical ensemble; married with controlled sustain and clarity; all sealed with an undeniably palpable feeling of warmth and resonance when performed.

S.L.P. DRUM KITS -STUDIO MAPLE-

Lacquer Finish

The Studio Maple kit is very original model in both sound and appearance, with Sound Focus Rings on the inside of the shells and 100% Maple Wood Hoops. It has a focused, warm, woody tone with clear attack, and a relatively short sustain with beautiful decay. While great for live performance, this model really excels in the studio, especially when seeking a warm sound with controlled resonance.

S.L.P. DRUM KITS -FAT SPRUCE-

Lacquer Finish

The Fat Spruce kit features luxurious 100% Spruce shells, which is rarely used as a material on complete drum sets. Its unique sound is fat and open with solid mids and a natural, acoustic vibe not found in more common materials. Furthermore, by utilizing die-cast hoops, it provides a very clear, focused sound. This kit is also very versatile with a wide tuning range – can go low to medium, optimal for R&B, Blues, and Ballads, or tuned higher to work really well for Jazz and Indie Rock. And also, its wide tuning range is very attractive. The sound character changes greatly according to tuning. When you need jazz style approach, it is best to tune to high pitch. Also, it can go low to medium, optimal for R&B, Blues, and Ballads, or tuned mid to work really well for Indie Rock.

S.L.P. DRUM KITS -DYNAMIC KAPUR-

Lacquer Finish

This model features Kapur wood, which has caught many drummers' attention for its solid, focused sound and rich mid- to low-end. We paired it with our Sound Arc Hoops for plenty of attack and moderately controlled overtones of the Kapur shells. It offers warm resonance and a very natural, comfortable feel. Because of its slightly dry sound and enhanced attack, it works very well for funk, fusion and gospel. The high volume potential also lends itself perfectly to rock music.

SUPERSTAR HYPER-DRIVE DUO

Lacquer Finishes

Superstar Hyper-Drive Duo is a unique and exciting series which brings new value to the current drumming world. Similar to the groundbreaking work we did with the Superstar Hyper-Drive's extra shallow toms in 2008 - drawing inspiration from recent performances of cutting-edge drummers - we have once again created distinct drum setups which are poised to inspire drummers. Opening the door to new approaches to drumming beyond the standard. The key component of this series is the 9" x 14" snare drum, which we call the "Duo Snare". This drum is unique not only because of its uncommon 9" depth, but also because it is equipped with floor tom legs and brackets. You can tune this drum low and place it where the first floor tom would traditionally go. As such, the snare can function as a low/deep snare with the snare wires engaged, or as a 14" floor tom with the snares off. This can lead to many unique phrasing opportunities. Once you experience playing on this new kit your eyes and ears will be opened to the infinite range of possibilities, plus it's a lot of fun. Just try it.

SUPERSTAR CLASSIC MAPLE

Exotic Finishes

For more than forty years, the Superstar name has stood for groundbreaking design, superior build quality, sterling tone, and clear projection. Superstar Classic once again upholds tradition by raising the bar for discerning drummers—and remarkably—does it while also lowering the price. Drawing on Superstar of the past, its classic TAMA T-shape badge and streamlined low-mass single lugs point to the simpler state of art of the 70's, while the ingenious Star-Mount system and the thinner gauge 100% maple shells eclipse anything in its class.

IMPERIALSTAR

Unicolor Wrap Finishes with Black Nickel Shell Hardware

With over 40 years of drum building experience, TAMA knows what drummers really want. With this in mind we sought out to design an affordable yet durable kit that retained many high-end features you'll find in our Silverstar, Superstar, and Starclassic lines. What we came up with was Imperialstar. Every aspect of the modern drum kit was exhaustively examined, reexamined, and then improved before it was accepted as part of the Imperialstar design.
