TAMA STAR BUBINGA

Lacquer Finishes

STAR is the flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. STAR Bubinga features a thin 5mm shell. Every shell comes equipped with 9mm thick Sound Focus Rings (SFR) for structural support. This shell configuration provides clear projection and resonance to highlight the distinct sound of Bubinga.

TAMA STAR WALNUT

Lacquer Finishes

STAR is the flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. Walnut has long been favored by furniture makers for both its beauty and durability. As a drum shell material, Walnut's naturally EQ'ed tone has been praised by the drum community for both the stage and the studio. The STAR Walnut shells project booming low end with enough cut to be heard through any mix.

STARCLASSIC MAPLE

Exotic Finishes

In the '80s TAMA's Superstars and Imperialstars reigned supreme - the perfect drums for the times. But TAMA's builders and designers wanted something that transcended trends, something timeless - drums that understood a player's passion and allowed the expression of every genre, style, mood, and technique. They created Starclassic Maple drums...and ignited the thin-shell revolution. And now the Exotic Finish line offers beautiful, one-of-a-kind exotic wood exteriors for that extra luxurious touch. Numerous options are available to meet the varied and critical needs of professional drummers including a selection of more than 30 different shell sizes. Starclassic Maple also features three shell hardware finishes to choose from: Black Nickel, Chrome and Smoked Black Nickel. Starclassic Maple is simply an unprecedented combination of sight and sound.

STARCLASSIC WALNUT/BIRCH

Lacquer Finishes

Exploring limitless possibilities, our result in the wake of countless experimentation came in the form of the Hybrid Shell Walnut/Birch: combining the superior quality warmth and mid to low frequency tone of the increasingly popular and truly unique Walnut, with the well-defined and uncompromisingly solid attack of Birch.

Whilst we successfully preserved their unique sonic trademarks, the characteristics of both Walnut and Birch blend to persuade a very focused sound that would define itself with great distinction within a musical ensemble; married with controlled sustain and clarity; all sealed with an undeniably palpable feeling of warmth and resonance when performed.

S.L.P. DRUM KITS -STUDIO MAPLE-

Lacquer Finish

The Studio Maple kit is very original model in both sound and appearance, with Sound Focus Rings on the inside of the shells and 100% Maple Wood Hoops. It has a focused, warm, woody tone with clear attack, and a relatively short sustain with beautiful decay. While great for live performance, this model really excels in the studio, especially when seeking a warm sound with controlled resonance.

S.L.P. DRUM KITS -FAT SPRUCE-

Lacquer Finishes

The Fat Spruce kit features luxurious 100% Spruce shells, which is rarely used as a material on complete drum sets. Its unique sound is fat and resonant with solid mids and a natural pure tone. Furthermore, by utilizing die-cast hoops, it provides a very clear, focused attack. It also has a very wide tuning range, making it suitable for a number of music styles. The drums sound great tuned up high for jazz, but also perform well at low to medium tension, optimal for R&B, Blues, Indie Rock and Ballads.

S.L.P. DRUM KITS -DYNAMIC KAPUR-

Lacquer Finishes

This model features Kapur material, which has caught many drummers' attention for its solid, focused sound and rich mid- to low-end. We paired it with our Sound Arc Hoops for plenty of attack and moderately controlled overtones of the Kapur shells. It offers warm resonance and a very natural, comfortable feel. Because of its slightly dry sound and enhanced attack, it works very well for funk, fusion and gospel. The high volume potential also lends itself perfectly to rock music.

SUPERSTAR CLASSIC

Exotic Finishes

For more than forty years, the Superstar name has stood for groundbreaking design, superior build quality, sterling tone, and clear projection. Superstar Classic once again upholds tradition by raising the bar for discerning drummers—and remarkably—does it while also lowering the price. Drawing on Superstar of the past, its classic TAMA T-shape badge and streamlined low-mass single lugs point to the simpler state of art of the 70’s, while the ingenious Star-Mount system and the thinner gauge 100% maple shells eclipse anything in its class.

IMPERIALSTAR

Unicolor Wrap Finishes

With over 40 years of drum building experience, TAMA knows what drummers really want. With this in mind we sought out to design an affordable yet durable kit that retained many high-end features you'll find in our Superstar, and Starclassic lines. What we came up with was Imperialstar. Every aspect of the modern drum kit was exhaustively examined, reexamined, and then improved before it was accepted as part of the Imperialstar design.
