**IBANEZ GUITAR AMPLIFIER  
FIRE POWER FG30**

# IBANEZ IBANEZ GUITAR AMPLIFIER FIRE POWER FG30

## OPERATION

### ① INPUT (Input jack)

Connect the output from the guitar.

### ② DIST. (Distortion ON-OFF switch)

Switch on for distortion sound.

### ③ GAIN (Gain control)

This control adjusts the gain of the preamplifier. Set the VOLUME control to "10" during normal operation and adjust the volume using the GAIN control.

### ④ VOLUME (Volume control)

This control adjusts the volume of the power amplifier without changing the character of the sound.

### ⑤ TREBLE (Treble control)

This control adjusts the treble sound. Set the control to "0" for cut and "10" for maximum boost.

### ⑥ MIDDLE (Middle control)

This control adjusts the middle sound. Set the control to "0" for cut and "10" for maximum boost.

### ⑦ BASS (Bass control)

This control adjusts the bass sound. Set the control to "0" for cut and "10" for maximum boost.

### ⑧ PHONE (Headphone jack)

Use this for such occasions as practicing at night. When headphone is used, no sound is produced by the speaker.

### ⑨ POWER (Power ON-OFF switch)

This switch turns the power ON-OFF.
