

Modern Classics...Ibanez Classical Guitars.

We live in both the modern and traditional worlds in guitar making. As for the classic guitar, every Ibanez GA series classic guitar is carefully built to offer elegance, refinement and subtlety of the classical guitars. The affordable GA3 and GA5 models are recommended from beginner students to even intermediate players. The GA7 offers the traditional craftsmanship in the classical guitar making for the beautiful tone of the nylon string. Also for child starters, GA9S 3/4-size model is available.

While we offer diversity even in the classical guitars. The GA6CE comes equipped with a piezo pickup and 4-band EQ on a cutaway classic guitar body. Also for more active-stage performers, the new GA5TCE offers a narrower neck and thinner cutaway body.
