

TAMA in a never ending pursuit for improved sound quality and craftsmanship introduces the New Generation of TAMA Drums....GRANSTAR.

GRANSTAR

GRANSTAR features 7-ply (3mm thickness) all birch cross laminated shells. Plastic covering finishes insure durability and long life. Newly designed hardware separates Granstar not only in looks but in function from all other existing drums. GRANSTAR.....the missing link between innovative drummers and contemporary rhythms.

TAMA

DOUBLE TOM HOLDER

The TAMA tom holder has many unique features that make it suitable for all playing styles and situations. The acoustic-mechanical design of the holder allows for exact positioning while complementing and adding to the acoustic sound of the drum itself.

The TAMA philosophy has always been not to penetrate or drill the drum shell unless absolutely necessary. The TAMA hexagonal L-rod attaches to the exterior of the shell. This method of mounting gives the shell the freedom to vibrate and not disturb the flow of air in the interior of the shell.

The hexagonal L-rod allows for a secure mounting of the tom and all position shifting is eliminated. The Omni-Ball is constructed of Nylon 6 and serves as a vibration absorber between the metal parts. Not only does this Omni-Ball absorb but it also isolates the vibration from one drum to the next.

MOUNTING BRACKET (low tom and floor tom)

The TAMA tom low and floor tom mounting bracket have the TAMA "ONE TOUCH LOCK" lever system. Like TAMA's famous "TOUCH LOCK" system, your adjustments are made quickly and with only one touch. The TAMA lock lever system operation is very simple. By turning the lever arm, the tom tom can be attached to the hexagonal L-rod of the tom tom holder. The same operation is for the floor tom when attaching the floor tom legs.

BASS DRUM SPUR AND BRACKET

This bass drum spur design should be very simple but built in a manner to withstand a tremendous amount of weight.

The TAMA bass drum spur is hexagonal bar that provides a wide, flat surface for positive gripping.

The spur mounting bracket is constructed of three parts, spur rod holder that allows for the length (weight) of the spur rod, pivot mechanism that determines the angle of the spur rod and the base piece that attaches to the shell itself to allow for storage of the spur.

INDIVIDUAL DRUMS

X-TRAS	
BASS DRUM	18 x 22 GB20X
	18 x 22 GB22X
	18 x 24 GB24X

REGULAR	
FLOOR TOM	14 x 18 GF18R
	16 x 16 GF16R
	16 x 18 GF16R

X-TRAS	
TOM TOM	8 x 8 GT8X
	10 x 10 GT10X
	10 x 11 GT11X
	11 x 12 GT12X
	12 x 13 GT13X
	14 x 15 GT15X

COLOR AVAILABILITY

SUN METALLIC GRAY	NILE BLUE
CHERRY ROSE	SLATE YELLOW
