

STEEL SNARE DRUM

**PICCOLO (3 1/4 x 14)
DEEP SHELL (8 x 14)**

STEEL SNARE DRUM

Tama upgrades its acclaimed steel snare drum series with new features and adds two entirely new models.

The 8" x 14" deep PM228 snare drum features a center ridge on the shell for greater strength, a stronger attack and fuller sound. The use of Tama's Two-Way pipe lugs and the Cam-lever strainer maximize shell resonance by minimizing shell surface contact. Also featured are the 2.3mm triple flanged Mighty Hoops, Remo heads and Tama steel sensitive snappy snares. Professional specs with full, undeniable power.

The crowning touch to this superb line is the new PM223 3 1/4" x 14" piccolo. With Cam-lever strainer, low mass tension casings, Mighty hoop, steel sensitive snares and incredible sound penetration, only Tama could offer this high demand instrument at such an unbelievable price!
