

Swingstar

Swingstar by Tama offers the beginning and intermediate player a five piece drum kit with a level of sound quality and features found in sets costing much more.

And now, Swingstar by Tama offers several new important upgrades for increased durability and ease of set up and adjustment. The bass drum will stay in place during performances thanks to a new spur system, Swingstar's new heavier duty snare drum stand offers greater stability, and the snare drum itself now features eight lugs for much easier tuning. And Swingstar by Tama features the acclaimed MTH100 bass drum tom mount. The MTH100 utilizes Tama's famous Omniball system that offers both ease of adjustment and rock-solid stability.

Once again, Swingstar by Tama sets a new standard in better features, sound, and value.
