- MH1500 Tom Holder
- HC21R Straight Cylindrical Stand
- HP90 Drum Pedal
- HH25R Hi-Hat Stand
- SS20R Snare Stand

Move the starting point forward. Since its re-debut in 2000, Tama Swingstar has made the word "entry-level" useless except for the price categorization. But Tama didn't stop the move. On the new Swingstar, hardware comes with double braced legs increased its stability even greater. The bass drum features O-ring muffler pre-installed heads, which make it much easier to get balanced kick. The variety in size is nothing you can find in other kits in this price range, from a very basic 5 pcs to so-called "Fusion kit" configuration featuring a suspended tom, choice of 20 inch and 22 inch bass drum. And add-on toms give you a possibility of limitless expansion.

•Double Braced Hardware•

Heavy-duty is durability, but light in weight. The new Swingstar hardware features double braced legs. Along with the 21.4mm diameter legs tubes they offer a higher level of stability.

Fusion Kit

Color: MNB0

SW522DFN

- SW 822D 18"x22" Bass Drum
- SW T10D 9"x10" Tom Tom

- MH1500 Tom Holder
- SA10 Single Tom Attachment
- HC21R Straight Cylindrical Stand
- HP90 Drum Pedal
- HH25R Hi-Hat Stand
- SS20R Snare Stand

Specifications

Bass Drum Acca-Tone Hoop

Tama's Acca-Tone hoops have it all. Their hi-tech GFR material offers both lighter weight and faster, more stable tuning than traditional metal hoops. Since Acca-Tone hoops use tension bolts instead of clanknuts and T-rods, head changes and packing up are a breeze. A special groove at the bottom of the hoop offers easy and secure pedal connection even when the bass drum is angled.

Swivel Foot Hi-Hat Stand

Tama adds yet another professional feature to the entry level price range. With HC23R's Swivel Foot Function, the foot pedal can be rotated around the tripod base which greatly expands set-up ease and flexibility. This is a feature you'll need and appreciate should you decide to go the twin-bass pedal route.

Onosphere Tom Holder

With its rock-solid stability, Tama's Onosphere system has been acclaimed by pro drummers for well over twenty years. With Sringstar's new MTH500 Onosphere system double tom holder, you can achieve almost any angle by simply loosening one T-bolt.

HC23R Bass Cymbal Stand

The HC23R add-on boom cymbal stand includes all features of HC23R, besides added "Convertible Boom Tube" that allows the boom arm stores neatly in the upper tube.

HP10 Drum Pedal

Like Tama's best selling Iron Cobra Power-Glide pedal, the HP10 features an offset cam which provides added acceleration and power as the pedal reaches the end of its stroke.

Beater Angle Adjustment

You just need 3 dual tone pedals with adjustable beater-footboard angles on most kits in this price range. But use HP10 cam.

Spring Tension Adjustment

Inspired by the acclaimed "Spring Edge" on Tama's high-end Iron Cobra pedals, this specially shaped nut prevents the spring seat from loosening.

Bass Drum Spur Brackets

OPTIMIZING

Our new design features two cast pieces for optimum stability and strength. The spur tips are switchable from spikes to rubber, and when it's time to pack up, you can even fold up the spurs without removing them from the bracket.
