Color - GMB

Move the starting point forward. Another break-through in price rates. The Swingstar Custom makes players to enjoy beauty of wood grain without costing a higher-class fare. The shell exterior is finished in transparent lacquer and protected by the coating process utilizing UV. The precise bearing edges provide the easier tuning that beginners need and the wide tuning range that pros demand. On the Swingstar custom, hardware comes with double braced legs increased its stability even greater. The bass drum features O-ring muffler pre-installed beads, which make it much easier to get balanced kick. You can choose from a very basic 5 pcs to so-called "Fusion kit" configuration featuring a suspended tom, choice of 20 inch and 22 inch bass drum. And add-on toms give you a possibility of limitless expansion.

•Available Colors•

GMB
(Glass Amber)

GMM
(Gloss Mahogany)

•Double Braced Hardware•

Heavy-duty in durability, but light in weight. The new Swingstar hardware features double braced legs. Along with the 25.4mm diameter base tube, they offer a higher level of stability.

Specifications

Bass Drum Acco-Tune Hoop (10, 12, 14, 16, 18, 20")
 Tama's Acco-Tune hoops have it all. Their 10-to-12 GFW material offers both lighter weight, and faster, more stable tuning than traditional metal hoops. Since Acco-Tune hoops use tension bolts instead of clanknuts and T-rods, head changes and packing up are a breeze. A special groove at the bottom of the hoop offers easy and secure pedal connection even when the bass drum is angled.

Swivel Foot Hi-Hat Stand

Tama adds yet another professional feature to the entry level price range. With HCSW's Swivel Foot function, the foot pedal can be rotated around the angled base which greatly expands set-up ease and flexibility. This is a feature you'll need and appreciate should you decide to go the twin bass pedal route.

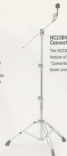

Omnisphere Tom Holder

With its rock solid stability, Tama's Omnisphere system has been acclaimed by pro drummers for well over twenty years. With Swinger's new MT9500 Omnisphere system double tom holder, you can achieve almost any angle by simply loosening one T-bolt.

HP10 Drum Pedal

Like Tama's best selling iron Cobra Power Glide pedal, the HP10 features an offset cast which provides added acceleration and power as the pedal reaches the end of its stroke.

HC228W Convertible Boom Cymbal Stand

The HC228W boom cymbal stand includes all features of HC22W, besides added "Convertible Boom Filter" that allows the boom arm stores neatly in the upper tube.

Roller Angle Adjustment

You don't want that loose pedal with adjustable tension/rollback angle on most sets in this price range. But our HP10 can.

Spring Tension Adjustment

Improving the adjustment the "Spring Tight" on Tama's high and low tension pedals. This specially shaped nut prevents the spring unit from loosening.

Bass Drum Spur Brackets

(PAT. PENDING)

Our new design features two cast pieces for optimum stability and strength. The spur legs are swivelable from nylon to rubber, and when it's time to pack up, you can even fold up the spurs without removing them from the bracket.
