STARCLASSIC BUBINGA ELITE

The Starclassic Bubinga ELITE series establishes a completely new standard for sonic and visual excellence. Exquisitely grained outer plies are carefully hand-selected to ensure extraordinary beauty and astonishing drum-to-drum consistency. STARCLASSIC MAPLE

In the '80s TAMA's Superstars and Imperialstars reigned supreme – the perfect drums for the times. But TAMA's builders and designers wanted something that transcended trends, something timeless – drums that understood a player's passion and allowed the expression of every genre, style, mood, and technique. They created Starclassic Maple drums...and ignited the thin-shell revolution.

STARCLASSIC PERFORMER  
B/B AND B/B EFX

The distinct and traditional sound of birch has made it the choice of many pro drummers for the last 30 years. But TAMA believes it's time to take birch in an entirely different direction. By using bubinga wood for the inner layers of a birch shell, TAMA has created a mixture that provides a new sound with a sweeter and deeper tone. This combination exhibits the focused attack of birch along with the enhanced lows of bubinga.

S.L.P.  
SOUND LAB PROJECT SNARE DRUMS

# S.L.P. -SOUND LAB PROJECT SNARE DRUMS

The snare drum is the keystone of any drummer’s sound. At some points in the musical journey, the player will embark on a search for the perfect drum to enhance their sound. With that player in mind, we created the S.L.P. series.

TAMA's extensive research and development process led to a varied offering of S.L.P. shell materials. Thickness and the specific parts were experimented with to find each shell material’s full sonic potential.

# S.L.P. -SOUND LAB PROJECT SNARE DRUMS

## CLASSIC MAPLE

With its Maple shell, this snare drum is a great example of what the S.L.P. series snare drum concept is all about. The combination of this choice of a hardwood shell, Super Sensitive Hi-Carbon Snappy Snares and Sound Arc Hoop results in a fully open and resonant sounding drum.

## POWER MAPLE

This combination of a 6.5” depth Maple shell and a 42-strand Snappy Snare gives this drum a powerful, open and resonant sound. A beautiful Maple Burl outer ply complemented by our Midnight finish is a perfect match with the Black Nickel hardware.

## G-MAPLE

This very thick 13ply 10mm Maple shell, combined with die-cast hoops creates a bright, powerful sound with surprising volume.

## G-BUBINGA

This 12-ply 10mm Bubinga shell provides an extraordinarily punchy sound with a large helping of low-end. The combination of 2.3mm flanged hoops and low-mass separate lugs allow the Bubinga shell to resonate more naturally.

**LAL145** 5"x14" 1.6mm thick Aluminum Shell

**LST1455** 5.5"x14" 1.2mm thick Steel Shell

**LBR1465** 6.5"x14" 1.5mm thick Brass Shell

**LST1365** 6.5"x13" 1.2mm thick Steel Shell

## SUPER-ALUMINUM

This drum features a thicker Aluminum 1.6mm shell with a uniquely wide internal 15mm flanged edge. Add to that a center ridge and new Sound Arc Hoops, and the vintage style sound is enhanced by a new layer of crispness and sustain. It's also very powerful, which is a characteristic not typically found in other generic Aluminum snare drums.

## VINTAGE STEEL

The Steel shell's powerful projection, plus the Sound Arc Hoops add sustain, wider tuning range and a fuller frequency response. This drum sounds great tuned low or high. By using the Super Sensitive Hi-Carbon Snappy Snare, this drum generates a rich and dry response, reminiscent of many vintage drums.

## BLACK BRASS

By using a relatively thicker 1.5mm Brass shell, the Black Brass model provides a fat powerful sound combined with warm resonance. This sound is a natural characteristic of Brass. A 2.3mm flanged hoop adds to the open sound, and a 42-strand Snappy Snare exhibits a distinct and desirable buzz.

## SONIC STEEL

This 1.2mm 13" Steel shell delivers a wide range of sound as well as feel. For instance, when tuned high it creates a remarkable crisp, sharp and open sound.

STARPHONIC SNARE DRUMS

A solid sound that features full projection with rich resonant tone, combined with fine, crisp snare response. In order to achieve this new sound, we have developed a concept that incorporates entirely new hoop, lug, and strainer designs, married to a variety of uniquely constructed drum shells. STARPHONIC snare drums are the result of three years of detailed research and precise testing. A symphony of sound springs to life from each STARPHONIC drum as a result of its combination of unique special features: naturally resonant shell material, Super Sensitive Hi-Carbon Snappy Snare wires, and a specially designed Grooved Hoop for a totally sharp and open sound.

## IRON COBRA DRUM PEDALS

The 2012 Iron Cobra refinements make it the pinnacle of smoothness and durability. The flatter, streamlined pedal design lends itself to advanced bass drum techniques that require foot maneuverability. And the new thicker Oiles Bearing Hinge is proof that our quest for durability never ceases.

Power Glide off-set cam pedals are typically chosen by players who want steady, powerful, and speedy action. Flexi-Glide strap-drive models are favored by players desiring traditional "floating" action with speed. The Rolling Glide is selected by players desiring the even, uniform response of a round cam.

### POWER GLIDE CAM

The best-selling Iron Cobra of the series, the Power Glide features a double-chained offset cam which increases power and speed as the beater reaches the end of stroke.

**HP900PSN** Power Glide Single Pedal  
**HP900PSWN** Power Glide Twin Pedal  
**HP900PSWLN** Left-Handed Power Glide Twin Pedal

### ROLLING GLIDE CAM

The Rolling Glide features a true round-shaped sprocket with a double chain for more durability, while still providing the smooth, uniform response of the traditional round cam.

**HP900RSN** Rolling Glide Single Pedal  
**HP900RSWN** Rolling Glide Twin Pedal

### FLEXI GLIDE CAM

There are still a lot of players who love the "floating" action of a strap pedal. The Flexi Glide pedal features a strap made of Dupont Kevlar® which is many times more durable than the old style nylon and leather straps. (Kevlar® is a registered trademark of the Dupont Corporation.)

**HP900FSN** Flexi Glide Single Pedal  
**HP900FSWN** Flexi Glide Twin Pedal

## SPEED COBRA DRUM PEDALS

Over the years, one of the greatest challenges facing drum pedal manufacturers has been to provide a pedal that "does it all". Or at the very least, focuses on the most critical features that drummers absolutely demand to enhance their performance. A difficult task, by any means. By today's standards the two most important features desired are speed and power. With most pedals, if you adjust the playability to address speed, you can sometimes lose power. And if you focus primarily on the feeling of power, you sometimes lose the desired speed. Now, the rules have changed. TAMA has Speed Cobra that delivers not only pure raw aggression and power, but lightening fast speed!

## STANDARD DRUM PEDALS

Cobra Jr. was developed with the same design concept as the Iron Cobra, offering high performance at an affordable price. The flat surface of the footboard offers enhanced control for slide technique, and the Power Glide cam shape allows for much lighter and smoother footwork. Both the HP300B and HP300TWB can be retrofitted for even faster footboard return with TAMA's Cobra Coil.

### SPECIFICATIONS

- Power Glide
- Para-Clamp
- Spring Tension Adjustment
- Beater Angle Adjustment
- Dual Sided Beater
- Hardshell Carrying Case

**HP300B** Standard Single Pedal  
**HP300TWB** Standard Twin Pedal

The HP30 utilizes the same offset cam design as the Iron Cobra Power Glide. The offset cam offers increased power and speed as the beater reaches the end of the stroke. The beater angle can be easily adjusted, a feature that is usually found only on more expensive pedals. The DS30 beater offers two different sounds: by rotating the beater head, you can choose felt for a softer controlled sound, or plastic for a louder and punchier sound.

## IRON COBRA HI-HAT STANDS

Designed to be the perfect counterpart to Iron Cobra bass pedals, Iron Cobra hi-hats offer incomparable sensitivity, lightning fast action, player friendly adjustments, and an absolutely noiseless design. New hi-hat stand innovations include our “Spring Seat” and “Swing Lock Clutch” system which helps deliver a more natural sound with additional resonance from the hi-hat cymbals.

### SPECIFICATIONS

#### SPRING SEAT (PAT. PENDING)

By tilting the bottom hi-hat cymbal, you can get a crisper and clearer hi-hat sound with your foot.

#### SWING LOCK CLUTCH (PAT. PENDING)

This allows the top hi-hat cymbal to float more freely, maximizing the natural resonance of the cymbals.

\*Our usual felt washers are also contained so you have the option to choose.

## SPEED COBRA HI-HAT STAND

The HH915N features the same long footboard as our Speed Cobra bass drum pedal. Its core design is based on the Iron Cobra Hi-Hat Stand – long acclaimed as one of the best performing hi-hat stands in the world. The longer footboard offers footwork flexibility, added control and sensitivity. The HH915N also features TAMA's famous Lever-Glide System which provides a smoother and lighter feel with faster action. New hi-hat stand innovations include our “Spring Seat” and “Swing Lock Clutch” system which helps deliver a more natural sound with additional resonance from the hi-hat cymbals.

## COBRA CLUTCH

#### HH905XP (US PAT. NO.7135633)

Finally a hi-hat control solution for double bass players! Instead of the loose, inexact, drop-clutch approach, the Cobra Clutch delivers a precise, fine-tuned degree of cymbal closure pressure, that's easily engaged and disengaged with a simple tap of the foot.

The Cobra Clutch comes standard with a form-fitted hardshell carrying case.

## 1ST CHAIR DRUM THRONE SYSTEMS

### ERGO-RIDER SERIES

The Ergo-Rider seat provides ergonomic comfort and support. A hybrid of a round seat and a saddle seat, the Ergo-Rider combines the versatility of the former and the playability of the latter. The front cutaway allows for completely unimpeded thigh movement even during the most rapid double bass patterns.

### ROUND RIDER SERIES

The Round Rider seat features a more rounded and gentle shape. The lower PVC seams mean less restriction of leg motion, so you can play with more comfort. Also, the dimple on the bottom of the seat provides a soft but solid feeling that allows drummers to play at their best.

### WIDE RIDER SERIES

TAMA's most popular 1st Chair throne employs a saddle-type seat filled with molded urethane foam that will hold its shape for years to come. 12mm thick plywood at the bottom of the seat provides extra strength and security. The Wide Rider is available with a durable PVC seat (HT530), or a special fabric cloth top (HT530C).

FEATURES

**QUICK-SET TILTER**  
(US PAT.NO.7385127)  
The toothless Quick-Set Tilter securely holds its position using the friction of six metal disc plates instead of traditional gears, so you can adjust it to any desired angle. This mechanism also has a more durable structure than a conventional gear tilter.

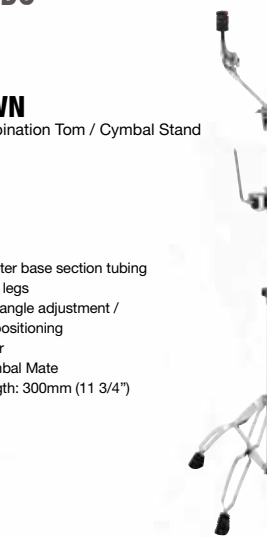

**QUICK-SET CYMBAL MATE**  
(US PAT.NO.7629526)  
By simply gripping and pressing the two buttons on the sides of the unit, users can attach and remove the Cymbal Mate with just one touch. This makes setting up cymbals a snap. As with the ordinary Cymbal Mate, fine adjustments to the cymbal's swinging motion can be made by rotating the unit.
