TAMA STAR DRUMS

# TAMA STAR BUBINGA

STAR is the new flagship line for TAMA drums. It takes the knowledge and research we cultivated for the Starclassic series to the next level, by reexamining every detail to enhance shell resonance. STAR Bubinga features a much thinner shell than Starclassic Bubinga. In addition, every shell comes equipped with 9mm thick Sound Focus Rings (SFR) for structural support. This shell configuration provides clear projection and resonance to highlight the distinct sound of Bubinga.

STARCLASSIC MAPLE

In the '80s TAMA's Superstars and Imperialstars reigned supreme—the perfect drums for the times. But TAMA's builders and designers wanted something that transcended trends, something timeless—drums that understood a player's passion and allowed the expression of every genre, style, mood, and technique. To achieve this, TAMA created Starclassic Maple.

STARCLASSIC  
PERFORMER B/B

For more than 30 years, the distinctive, traditional sound of birch has made it the go-to choice for numerous pro drummers. Now, TAMA takes birch in an entirely new direction. Proportionately melding inner plies of bubinga with the classic birch exterior, TAMA has created a blended shell that combines the focused attack of birch, with the enhanced low-end of bubinga—delivering totally a new sound—both dynamic and versatile.

SUPERSTAR CLASSIC

-Maple shell / Lacquer Finish

NEW

For more than forty years, the Superstar name has stood for groundbreaking design, superior build quality, sterling tone, and clear projection. Superstar Classic once again upholds tradition by raising the bar for discerning drummers—and remarkably—does it while also lowering the price. Drawing on Superstar of the past, its classic TAMA T-shape badge and streamlined low-mass single lugs point to the simpler state of art of the 70's, while the ingenious Star-Mount system and new thinner gauge 100% maple shells eclipse anything in its class.

SNARE DRUMS

The snare drum is arguably the most critical—and most personal—aspect of the modern drum kit. While technique and style figure prominently into making a statement with the snare, the drum itself is the fundamental element on which a drummer’s “voice” is developed. Over the past four decades, TAMA has created numerous snare drums—each serving as a facet for greater individual expression. Today, TAMA offers a wide range of snares, employing an equally wide array of sizes, materials, and design elements, for you to build your own unique sound.

CLAMPS AND ATTACHMENTS

Back in the 1970s, TAMA's introduction of the multi-clamp created a real revolution in the way drummers approached drum setup. Today, TAMA multi-clamps are the standard by which all others are judged.

CLAMPS AND ATTACHMENTS

UNIVERSAL CLAMP

MC66

One side can hold pipes with diameters from 19.1mm to 28.6mm, while the other side is a ratchet holder that can hold a rod from 9mm to 12mm in diameter at various angles. An excellent clamp for adding an array of new set-up possibilities.

LIST: \$45.00

MULTI-CLAMP

MC62

A double multi-clamp for connecting two pipes from 19.1mm to 28.6mm in diameter. Both sides feature the FastClamp Easy Set-Up System.

LIST: \$40.00

HI-HAT ATTACHMENT

MXA53

Simply designed closed hi-hat attachment that allows for two different settings by turning a lever. Attachable to stands from 19.1mm to 28.6mm in diameter. Great for double bass or double pedal players. And, you can also set up half open hi-hat cymbals by adjusting the spring.

LIST: \$91.00

Octobans are one of TAMA's first original instruments and have been used by a diverse group of progressive players including Billy Cobham, Simon Phillips, Stewart Copeland, Bill Bruford, Mike Portnoy, and Tim Alexander. Instead of relying on changing drum diameters, the pitch of each Octoban differs according the length of the drum's shell. The 6" diameter shells can be tuned melodically and are available in low-and high-pitch sets.
