

# TAMA STAND WEIGHT

## INSTRUCTION MANUAL

Thank you for your purchase of TAMA's Stand Weight. To ensure the safe and efficient use of this product, please read through this manual before using. Store the manual in a convenient place for future reference.

### CAUTION

This weight is specially designed for Drum Hardware and Microphone Stands, and weighs approximately 3kg/6.6lbs. To prevent injury and/or damage, do not drop or throw the weight.

Picture (1)

Picture (2)

Picture (3)

- \* Detach the hook-and-loop fastener (A) in Picture (1). Then, loop the weight around the base of the stand and secure the weight as in Picture (2).
- \* As seen in Picture (3), the Stand Weight can be placed inside a bass drum to secure muffling in place. The Stand Weight can also be used for a more controlled and tighter bass drum sound (sound may vary depending on usage).
- \* A hook fastener (B) in Picture (1), and a loop fastener can be found on opposite sides of the Stand Weight. This allows several Stand Weights to be stacked together on one stand. Additionally, the Stand Weight can be secured inside the bass drum by attaching another hook-and-loop fastener (sold separately) to the inside of the shell.
